

# Symantec Backup Exec™ 2010 for Windows® Small Business Server

Comprehensive Backup and Recovery Designed for Your Growing Small Business

---

## Overview

Symantec Backup Exec 2010 for Windows Small Business Server is the perfect data protection solution for Microsoft Windows Small Business Server Standard and Premium Editions. This robust solution provides NEW integrated deduplication with the Deduplication Option, granular restore features, open file protection, disaster recovery and backup protection for Microsoft Exchange, SharePoint Services, SQL and Windows workstations. Backup Exec also delivers high powered agents and options providing comprehensive data protection for the latest VMware and Hyper-V virtual server environments, robust storage management tools and extensive application support including protection for remote Windows and heterogeneous servers through a single console. Symantec Backup Exec 2010 for Windows Small Business Server is easy to install and manage, providing exceptional value at a low price making Backup Exec 2010 for Windows Small Business Server the optimal backup and recovery solution designed for your growing small business.

---

## Key Benefits

***Delivers market-leading Windows data protection with more than 1.5 million customers globally***

- Comprehensive data protection and recovery for Microsoft Windows Small Business Server 2008, and 2003 - Standard and Premium Editions.
- Reduce storage costs while optimizing network utilization through integrated deduplication and archiving technology.
- First-to-market granular recovery for Exchange, SQL and Active Directory environments running in a VMware and Microsoft Hyper-V environment.

- Comprehensive disk and tape storage for the latest physical and virtual server systems through one console including VMware and Hyper-V virtual systems.
  - Bundled data protection for Microsoft Exchange, SharePoint and SQL server environments.
  - Reduced storage requirements and recovery times with patent-pending granular data recovery of leading Microsoft applications, including Exchange, SharePoint and Active Directory.
  - Continuous data protection for desktops and laptops providing point-in-time recovery.
  - Ensure all data is backed up even while files are open with Advanced Open File Protection (AOFO).
  - Complete bare-metal disaster recovery with Backup Exec System Recovery 2010.
  - Easy setup and simplified management through user-friendly wizards.
- 

## NEW Product Highlights

- NEW integrated deduplication option (using Symantec NetBackup PureDisk technology) reduces backup times and storage costs.
- NEW bundled support for SharePoint systems including fast and simple granular recovery of individual documents, document sets (SharePoint 2010), external lists (SharePoint 2010), lists, sites or list items.
- NEW bundled disaster recovery for critical systems with Backup Exec System Recovery 2010 Server, Small Business Server Edition.
- NEW unified archiving (powered by Symantec Enterprise Vault) efficiently consolidates growing file server data volumes.

- NEW virtual server application support with first-to-market Exchange, SQL and Active Directory backup and recovery for virtual environments and enhanced VMware vSphere 4.1 and Microsoft Hyper-V R2 support.
- Windows 7, Exchange 2010 SP1, SharePoint 2010, SQL 2008 R2, MAC OSX 10.6 and Windows Server 2008 R2 support provides comprehensive protection for the latest Windows and MAC environments.
- NEW Lotus Domino 8.5.x support with simplified backup and recovery of the Domino Attachment and Object Service (DAOS) store and associated NLO files.
- Enhanced Virtual Tape Library (VTL) support and licensing, easily protect a VTL storage environment as a unique device and view valid VTL functions with new licensing per VTL environment.
- Enhanced installation and backup wizards reduce the time and complexity of setting up your backup environment.
- NEW Backup recommendation tool identifies potential gaps in your Windows backup strategy and provides recommendations on the agent(s) required to ensure complete data protection.

### **Bundled Protection**

Symantec Backup Exec 2010 for Windows Small Business Server provides scalable easy-to-manage backup and recovery protection for Windows Small Business Server based environments. Symantec Backup Exec agents and options easily expand any Backup Exec environment to support critical applications, databases, and storage configurations:

#### **Core License**

Backup Exec 2010 for Windows® Small Business Server

#### **Included Agents and Options with Core License**

#### ***Backup Exec Agent for Microsoft Exchange Server (one license)***

Eliminate Exchange mailbox (MAPI) backups and still restore individual messages or mailboxes in seconds from a single pass backup with the patent-pending Backup Exec Granular Recovery Technology. This fast and flexible technology reduces the backup and recovery time as well as storage needed on disk or tape media while protecting vital Exchange Server 2003, 2007 and 2010 SP1 data – all while the application is online. The agent provides full, incremental, or differential backup and restore of embedded objects, attributes, and all Microsoft Outlook® components.

#### ***Backup Exec Agent for Microsoft SQL Server (one license)***

This agent helps ensure that business-critical databases and e-business data are protected in the event of application- or hardware-based corruption or loss. It provides SQL Server 2000, SQL Server 2005 and new 2008 R2 users with comprehensive data protection. Execute differential backups as well as Transaction Log backups with automatic truncation. Integration with SQL Server snapshots means quick restores of SQL Server snapshots in seconds. Also, restore with one-pass recovery of the last full backup and any subsequent backup as a single restore job; or perform “rollback restores,” enabling a database to be recovered to a specific moment in time.

#### ***Backup Exec Agent for Microsoft SharePoint (one license)***

Recover critical data in seconds with the enhanced Agent for Microsoft SharePoint. Using a 32-bit or 64-bit Backup Exec 2010 media server, this agent can protect 32-bit or 64-bit SharePoint servers deployed on a Single-Server or within a Multi-Server Farm. This Agent leverages the innovative Granular Recovery Technology (GRT) which helps users save time and money by providing the ability to restore individual documents and now sites and list items quickly and easily from a single-pass database backup.

#### ***Backup Exec Agent for Windows Systems (one license)***

With the continued benefits of the Remote Agent for Windows Servers and the Continuous Protection Agent

capabilities, this agent now also includes the Advanced Open File Option and Intelligent Disaster Recovery Option. With four powerful technologies wrapped into one agent, users truly have complete data and system protection for every remote Windows server.

**Backup Exec Desktop and Laptop Option (up to 75 licenses)**

Backup Exec Desktop and Laptop Option delivers continuous data protection and efficient recovery for Small Business Server desktops and laptops whether in the office or on the road. In addition to improving data protection and efficiency, this option enables users to restore their own files and maintains synchronization between multiple desktops and laptops, so the most up-to-date file versions are available on all of a user's computers.

**Backup Exec System Recovery 2010 (Small Business Server Edition and Server Edition - one license of each)**

Symantec Backup Exec System Recovery 2010 complements your Backup Exec environment by providing a simple, cost-effective bare-metal disaster recovery solution that helps minimize downtime and avoid disaster by easily recovering complete Windows systems in minutes—even to different hardware, virtual environments, or remote locations.

**Additional Agents and Options**

Backup Exec 2010 Agents and Options are now supported on Backup Exec 2010 for Windows Small Business Server environments (except Central Admin Server Option, SAN Shared Storage Option, and Exchange Mailbox Archiving Option). Easily expand and scale your Backup Exec small business environment to support critical applications, databases, and storage configurations.
