

Symantec™ Endpoint Protection Small Business Edition

Easy-to-use, enterprise-level protection for small businesses

Overview

Comprehensive protection, minimal administration

Symantec™ Endpoint Protection Small Business Edition provides easy-to-use, enterprise-level protection that optimizes performance and system resources so small businesses can get up and running quickly. It is designed for small business customers who want comprehensive protection that is simple and straightforward to install, deploy, and manage. The streamlined management user interface and easy-to-follow wizards help simplify deployment as well as reduce the need for any specialized training. Pre-configured notifications and automatic security reporting make this a “ready-to-go” product, saving businesses both time and money. Symantec™ Endpoint Protection Small Business Edition also provides the fastest boot time in the industry¹ and the lowest overhead when it comes to everyday interaction with files and applications. Small businesses can now have confidence in their security and focus on running and growing their business.

Symantec™ Endpoint Protection Small Business Edition leverages award-winning Symantec Endpoint Protection technology, which integrates best-of-breed technologies into a single integrated software agent, lowering cost and complexity. It also includes Symantec TruScan™ Proactive Threat Scan, a proprietary technology that enables small businesses to protect against threats not yet identified by security vendors.

1. Based on SEP Tolly 2 Reporting, November 2008

Symantec™ Endpoint Protection Small Business Edition utilizes the world’s leading scalable security infrastructure, the Symantec Global Intelligence Network, which gives Symantec unmatched insight into today’s threats. Symantec™ Endpoint Protection Small Business Edition protects to the same level as the largest global business, yet is designed specifically for the small business environment, prioritizing optimal performance and low costs. All businesses, regardless of size, deserve to receive unmatched protection from Symantec, the proven, market-leading endpoint security vendor.

Symantec Protection Center is the management console for Symantec Endpoint Protection Small Business Edition.

Symantec LiveUpdate is a useful update tool that will protect your endpoints against the latest threats.

Key benefits

Easy Management

Deploy with ease—Built-in tools, such as the Client Installation Wizard, help deploy agents across the customer environment with ease.

Simple management console—A single integrated interface, and a single communication method and content delivery system.

Automated reporting—Stay up to date with the most current information on endpoint security posture with automatic summary reports that proactively monitor the network, thereby reducing day-to-day management overhead.

Superior performance—Minimize performance impact with the fastest boot time in the industry and the lowest impact on daily applications and files.²

Enterprise-level protection

Unmatched protection—Confidently secure your business assets with unmatched protection from the market-leading endpoint security vendor.

More than antivirus—Secure against unknown threats with proven antivirus protection, spyware protection, and proactive protection against unseen threats using Symantec’s TruScan™ Proactive Threat Scan that does not rely on a signature.

Symantec Global Intelligence Network—Keep your business up and running regardless of today’s global security threats with intelligence from the industry-leading Global Intelligence Network.

intuitive user interfaces that require minimal training.

Single agent and single management

console—Integrates multiple essential endpoint security technologies into a single agent managed from a single console, so you can increase your protection and manageability while reducing your cost, complexity, and risk exposure.

System Requirements

Client workstations and servers

Processor

- 1-GHz Intel Pentium III processor or compatible architecture minimum (32-bit) (Intel Pentium 4 or equivalent recommended) *Note: Itanium® is not supported*
- 2-GHz Pentium 4 with x86-64 support or equivalent minimum (64-bit)

Memory

- 256 MB RAM, (1 GB recommended)

Hard Disk Space

- 700 MB or more

Browser

- Internet Explorer 6 or later

Windows® Operating Systems

- Windows 2000 Professional/Server
- Windows XP (32-bit, 64-bit)
- Windows XP Home
- Windows XP Embedded
- Windows Vista (32-bit, 64-bit)

- Windows Server 2003 (32-bit, 64-bit)
- Windows Server 2008 (32-bit, 64-bit) (R2 and all Service Packs supported)
- Windows Small Business Server 2003 (32-bit, 64-bit) (all Service Packs supported)
- Windows Small Business Server 2008 (64-bit) (all Service Packs supported)
- Windows Essential Business Server 2008 (64-bit) (all Service Packs supported)
- Windows 7 (x86 versions on 32-bit) Windows 7 (all x64 versions on 64-bit)

Management Server (Symantec Protection Center)

Processor

- Intel® Pentium® processor or compatible architecture (32-bit and 64-bit). *Note: Itanium® is not supported*

Memory

- 1 GB RAM (2-4 GB recommended)

Hard Disk Space

- 4 GB or more

Operating Systems

- Windows 2000 Server, Advanced Server, Datacenter Server, Small Business Server with Service Pack 3 or later
- Windows XP Professional (32-bit, 64-bit)
- Windows XP Home
- Windows Server 2003 (32-bit, 64-bit) (all service packs supported)
- Windows Server 2008 (32-bit, 64-bit) (R2 and all Service Packs supported)
