

Symantec Mobile AntiVirus™ for Windows Mobile®

Mobile security software that provides device-resident threat protection for on-device assets and helps to prevent the spread of threats from the device to core infrastructure Enterprise IT assets

Overview

Symantec Mobile AntiVirus™ enables secure mobile computing by providing comprehensive protection against malicious threats that target Windows Mobile operating systems. On-device, automatic, real-time scanning helps protect against threats downloaded from the Web, sent via email or a Wi-Fi connection, or received via Bluetooth® or infrared ports. Real-time auto-protect prevents incoming threats from being executed and logs the event for administrators to track security event activity. Virus repair, quarantine and delete options enable simple threat management and removal. The wireless LiveUpdate™ from Symantec helps to ensure up-to-date virus definitions.

Key benefits

- Detect and quarantine viruses for administrator review
- SMS listener allows administrators to remotely initiate on-device actions
- Advanced event log capability allows administrators to generate device file activity logs
- Real-time Auto-Protect with cached scanning support
- Automatic, up-to-date virus definitions via scheduled wireless Symantec LiveUpdate™
- Award-winning Symantec antivirus technologies protect handheld-resident data against malicious code downloaded from the Web, sent via email or Wi-Fi connection, beamed via Bluetooth or infrared ports

- Backed by Symantec Security Response, the world's leading Internet security research and support organization
-

Key features

On-device, real-time, automatic scanning for threats

A Symantec antivirus micro-engine provides both real-time and on-demand scanning functions, as well as wireless Symantec LiveUpdate capability when wireless Internet connectivity is available.

The Auto-Protect function constantly scans and detects malicious code without user intervention, at the point of entry, before the handheld device is infected. With Auto-Protect, intercepted threats can't be opened without interaction on the part of the user who has the option of deleting or repairing the infected file.

The user can select optional scanning functions, including

- On-demand scanning
- Optional automatic scans after synchronizing with a PC or upon inserting a media card

Administrative tools

- Symantec™ System Center plug-in enables mobile security events to be captured to track system and regulatory compliance
- Deployment tools compatible with third-party MDMs

System requirements

Mobile device

- Operating Systems:
 - Microsoft Windows Mobile 6.1 Standard
 - Microsoft Windows Mobile 6.1 Professional
 - Microsoft Windows Mobile 6.0 Standard
 - Microsoft Windows Mobile 6.0 Professional
 - Microsoft Windows Mobile 5.0 Smartphone
 - Microsoft Windows Mobile 5.0 Pocket PC
- Device Storage:
 - Windows Mobile 6 Professional – 3.3 MB
 - Windows Mobile 6 Standard – 3.4 MB
 - Windows Mobile 5.0 Pocket PC – 3.3 MB
 - Windows Mobile 5.0 Smartphone – 3.4 MB

Administrative tools

- Minimum 400-MHz processor or higher
- Minimum 256 MB, additional recommended
- Minimum 120 MB free disk space, 250 MB expected usage
- Operating systems:
 - Microsoft Windows® 2000
 - Microsoft Windows® XP
 - Microsoft Windows® 2003 Server
