

Symantec™ Scan Engine

Fast, scalable, and reliable content scanning services and API for protection against viruses and other unwanted content

Overview

Scan Engine 5.2 is a TCP/IP server and programming interface that allows third parties to incorporate scanning technologies into their proprietary applications. Scan Engine integrates proprietary and patented URL filtering scanners, and industry-leading antivirus technology for fast, scalable, and reliable content scanning services to help organizations protect against viruses, spyware, and other malware threats.

What's New in 5.2

- Improved performance through changes to default tuning parameters
 - New Java and .NET API's (in addition to current C++)
 - Rapid release antivirus definition support
 - Resource consumption reporting including details on:
 - Running threads
 - Scan statistics
 - Number of processors in use by scan engine
 - Log file size and available disk space
 - Support for Symantec Security Information Manager
 - Added support for Red Hat Enterprise Linux 5, SuSE 10
-

Features and Benefits

Features

- Blocks spyware, adware and other security risks
- Delivers statistical and detailed activity reports
- Central quarantine allows administrators to redirect all irreparable, virus-infected files to a safe area on a centralized server
- User-friendly interface with an overview page of statistics and system information

Benefits

- Simple integration with third-party software and
 - Enables third-party hardware and software vendors and ISPs to add value to their offerings by supporting Symantec's URL filtering and industry-leading antivirus technologies
 - Client applications can perform lookups of the Symantec categorized URL database to filter Web sites
 - Dynamic Document Review adds a second layer of URL filtering protection by providing multi-lingual, context-sensitive heuristic scanning of uncategorized Web pages
-

System Requirements

Supported Operating Systems

- Windows 2008 (32-bit and 64-bit)
- Windows 2008 R2
- Windows 2000 Server with the latest service pack
- Windows 2003 (32-bit and 64-bit)
- Windows Server 2003 R2 (32-bit)
- Red Hat Enterprise Linux 5.x (32-bit and 64-bit)
- Solaris(SPARC) 9 and 10 (32-bit)
- Red Hat Linux Enterprise Server 3 and 4 (32-bit)
- Red Hat Linux Advanced Server 3 and 4 (32-bit)
- SUSE Linux Enterprise Server 9 and 10 (32-bit)
- All the supported operating systems are supported under VMware

Supported Browsers

- Mozilla Firefox 1.5 or later
- Microsoft Internet Explorer 6 (SP1) or later

Minimum Hardware Configuration

- 2.4 GHz Pentium 4 or 1 GHz SPARC
- Java 5 or 6

Data Sheet: Archiving Symantec™ Scan Engine

- 1 GB RAM
 - 500 MB hard disk space available
 - 1 NIC running TCP/IP with a static IP address
-
