Trend Micro

Control Manager™ 5.5

Centralized Security Management for the Enterprise

As enterprises deploy security solutions across geographically distributed clients and servers, IT departments require sophisticated management tools to monitor critical metrics about security status, to proactively identify weak spots, and to simplify security administration.

Trend Micro Control Manager™ 5.5 provides a convenient centralized security management console that is designed to minimize administrative complexity and work with Trend Micro solutions to maximize security. Its intuitive dashboard comes with four standard views for a quick start, providing at-a-glance visibility into security status. The dashboard now enables easy customization, with the ability to easily create views to fit any need. This powerful security management tool lowers costs by simplifying security management, providing enterprise-wide visibility into managed products down to the individual client level. Control Manager enables advanced protection against malware and web threats, and streamlines routine administrative tasks for greater efficiency.

Control Manager also includes new access to threat statistics from the Trend Micro Smart Protection Network™ cloud-based security infrastructure. Administrators gain insight into both the global threat landscape and the protective power of Trend Micro security in their own environment. Control Manager provides consolidated reporting across products, ad hoc query capability, and configurable alerts. The resulting actionable security intelligence allows greater control over the enterprise security posture, as Control Manager distributes IT workload, consolidates data, automates updates, and ensures greater scalability.
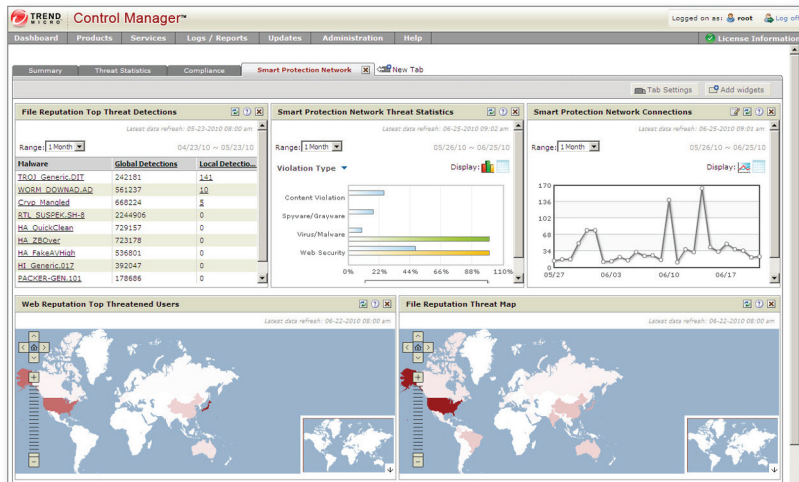

KEY BENEFITS

- **Simplifies administration** with intuitive web-based console
- **Reduces risk** with consolidated updates and security alerts
- **Increases scalability** with multi-tiered management
- **Improves security intelligence** with easy access to critical data
- **Lowers security management costs** by saving time and reducing IT workload

> " Trend Micro™ Control Manager gives us the security intelligence we need to maximize the level of security across our enterprise—the integrated update management and automatic alerts enable us to quickly address issues. "

KEY FEATURES

Web-based Centralized Security Management Console

- Creates integrated, centrally managed security framework for a unified defense
- Streamlines management with customizable role-based administration, automated updates, and license management
- Provides enterprise-wide visibility into managed products—including down to the level of individual clients

New! Customizable Dashboard

- Comes fully functional out of the box with four standard tabs, or views
- Allows flexible configuration of additional dashboard views using pre-defined widgets
- Provides actionable intelligence, facilitating deeper investigation into security events
- Toggles data presentation between graphic or tabular views

New! Smart Protection Network Threat Statistics

- Displays statistics and tracks the latest trends for Trend Micro's cloud-based threat intelligence
- Includes metrics for both the global threat environment and the local deployment

Customizable Reporting*, Ad Hoc Query, and Configurable Alerts

- Allows easy access to critical security information
- Enables quick start with pre-defined reporting templates
- Facilitates compliance with internal IT audit requirements
- Supports simple data interpretation with intuitive charts and graphs

Multi-tiered Management*

- Provides highly scalable and flexible multi-tiered management model for large-scale, multi-site deployments
- Distributes IT workload, allowing regional IT staff to manage local events and incidents
- Consolidates data for a master view of Control Manager servers throughout the network

* Available in Control Manager Advanced

Control Manager features an intuitive web-based interface.

Control Manager™ is available in two versions: Standard and Advanced.

Trend Micro Control Manager	Standard	Advanced
Web-based Centralized Security Management	✓	✓
Customizable Dashboard, Ad Hoc Query, Alerts	✓	✓
Smart Protection Network Threat Statistics	✓	✓
Visibility into Clients		✓
Multi-Tiered Management		✓
Customizable Reporting		✓
License Management		✓

SERVER HARDWARE REQUIREMENTS

- Intel Pentium III: 1GHz or higher
- 2GB RAM (4GB Recommended)
- 900MB disk space for Control Manager Standard/Advanced
- 300MB disk space for SQL2005 Express SP3 (Optional)
- 20G disk space recommended as reserve for growing logs and database demands

SOFTWARE REQUIREMENTS

Operating System

- Windows Server 2003 Standard/Enterprise Edition SP2 (R2), Windows Server 2003 Standard/Enterprise Edition (R2) SP2 (WOW 64-bit), Windows Server 2008 Standard/ Enterprise Edition SP1 or later (R2), Windows Server 2008 Standard/Enterprise Edition SP1 or later (R2) (WOW 64-bit)

Web Console

- Microsoft IIS 6.0 (for 2003 platform), IIS 7.0 (for 2008 platform), ISS 7.5 (for 2008 R2 platform)

Database Software

- Microsoft SQL Server 2005 Express SP2 or later, Microsoft SQL Server 2005 Standard/ Enterprise (including 64-bit) SP2 or later, Microsoft SQL Server 2008 Express (including 64-bit) or later, Microsoft SQL Server 2008 Standard/Enterprise (including 64-bit) or later
- Microsoft SQL Server 2005 Express SP3 is included

Virtualization Support

- VMware ESX 4.0, VMware Workstation 6.0 or later, Windows Server 2008 R2 Hyper-V 2.0

Trend Micro™ Enterprise Security

Trend Micro Control Manager is a key component of Trend Micro Enterprise Security, a tightly integrated offering of content security solutions and services powered by the Trend Micro Smart Protection Network™. Together they deliver maximum protection with minimal complexity.

Control Manager is available standalone, or as part of these security suites:

- Enterprise Security Suite
- Enterprise Security for Endpoints and Mail Servers
- Enterprise Security for Endpoints
- Enterprise Security for Communication and Collaboration
