

Trend Micro™

Encryption for Email Client

Easiest encryption for achieving compliance

Email has become a vital business tool for sending and receiving even the most confidential messages. Yet any time you send sensitive information over the Internet, you expose yourself to the risk of a data breach. That's why encryption is no longer an option for many organizations seeking to protect email privacy and achieve regulatory compliance. The only real question is finding the right encryption solution for your needs—one that delivers rigid security without the heavy administration that encryption typically demands.

Trend Micro™ Encryption for Email Client plugs into Microsoft® Outlook® to minimize IT burden, simplify compliance, and lower TCO. Built with Trend Micro™ PrivatePost™ technology, this hosted key management solution helps ensure availability of encryption keys 24x7, offering password and key recovery with no IT intervention. Users can encrypt emails by merely clicking a button on the desktop. Furthermore, the web-based Zero Download Reader makes it easy to share encrypted files with anyone inside or outside your organization. Trend Micro Encryption for Email Client is simply the easiest way to secure your business communications without overburdening your IT staff.

KEY FEATURES

Seamless Integration

- Plugs into Microsoft Outlook for user-designated email encryption
- Encrypts emails with a mere click of a button
- Simplifies use, facilitating adoption and improved productivity

Effortless Key Creation

- A recipient's email address is all that's needed to create encryption keys
- Users can send and receive encrypted files without assistance from IT

Hosted Key Management

- Accelerates deployment, lowers up-front costs, and reduces operational complexity
- Minimizes IT burden, decreasing time spent on key management and privacy issues

24x7 Key Recovery

- Offers password and key recovery with no IT intervention
- Ensures worldwide availability of encryption keys all day, every day

SOFTWARE

- Securing Intellectual Property

KEY BENEFITS

For IT

- Ensures privacy and aids regulatory compliance
- Minimizes end-user training
- Saves time and resources with hosted key management

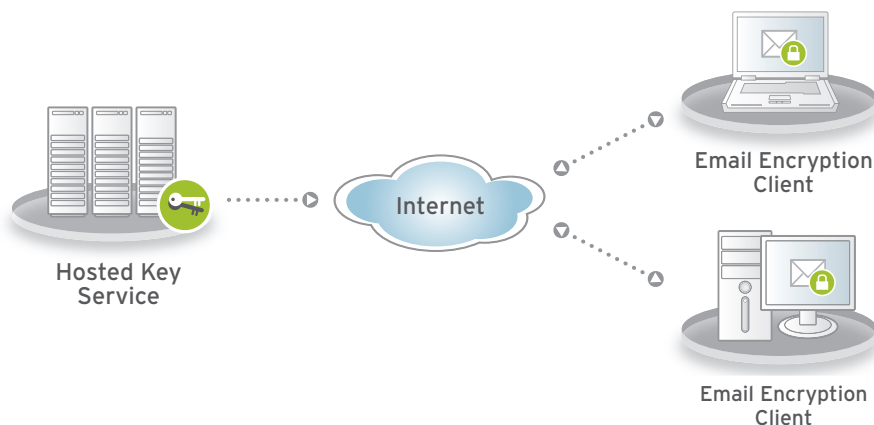

For Sender

- Sends encrypted email no differently than standard email
- Provides uninterrupted access to data with 24x7 availability of encryption keys
- Protects sensitive data and allows secure delivery to any recipient—both inside and outside your organization

For Recipient

- Secures both incoming and outgoing emails and attachments to comply with regulations and requirements of trading partners
- Decrypts via web-based Zero Download Reader for those without client software installed

Trend Micro™ Encryption for Email Client uses identity-based encryption and hosted key management to deliver end-to-end email data protection.
