

Trend Micro™

# PortalProtect™ for Microsoft® SharePoint®

A Dedicated Layer of Protection for Confident Collaboration

More than ever, companies use Microsoft SharePoint to connect employees, partners, and even customers for real-time collaboration. They're also using more SharePoint capabilities than ever before—moving beyond simple content repositories to build team sites, create intranet and extranet portals, and utilize wikis and blogs. These dynamic collaboration environments help optimize productivity, but they also multiply your security risks, especially when opened to external users. File sharing and the real-time interactivity of Web 2.0 give cybercriminals more opportunities to infiltrate and steal data—and it only takes one data breach to destroy the trust you've built.

**Trend Micro™ PortalProtect™** offers a dedicated layer of protection for Microsoft SharePoint, guarding against malware, malicious links, and other threats to help ensure that your collaboration systems are secure. PortalProtect goes beyond standard antivirus protection to deliver highly scalable web threat and data loss prevention, while web reputation technology stops malicious web links—whether intentional or mistyped—from entering your discussion forums, blogs, and wikis. With PortalProtect, companies of any size can use SharePoint to safely distribute information, files, and links while minimizing the risk of data loss and the spread of malware.

## KEY FEATURES

### Leading SharePoint Antivirus & Antispyware

- Blocks infected files from entering SharePoint
- Protects data from corruption and theft
- Stops high-risk files based on “true file type”
- Prevents threats from spreading among users

### Advanced Content Filtering

- **New!** Prevents posting of objectionable content to blogs, wikis, and forums
- **New!** Incorporates data loss prevention technology with over 30 regional pre-canned policies to prevent data loss and compliance violations
- **New!** Enables granular policies based on Microsoft Active Directory® or SharePoint users/groups

### New! Web Reputation Technology

- Blocks web links to malicious or compromised websites
- Provides immediate protection using up-to-the-minute threat intelligence

### Low Administration

- Requires half the administration time required by competitive solutions<sup>1</sup>
- Strong group configuration and management with centralized logging and reporting
- **New!** Drill-down reporting identifies the source of an incident
- **New!** Role-based access control with single sign-on
- Integrates with strategic Microsoft tools, including Digital Dashboard and Web Parts

### Enterprise Scalability

- Supports hundreds of thousands of users
- Installs efficiently through remote deployment
- Optimized with agent-less database inspection
- Scans twice as fast as competitive solutions<sup>2</sup>
- Scales to any deployment size
- Native 64-bit support

## SOFTWARE

### Protection Points

- SharePoint server

### Threat Protection

- Antivirus
- Antispyware
- Web Threat Protection
- Data loss prevention
- Content Filtering

## KEY BENEFITS

- Provides dedicated protection for SharePoint users and data
- Stops the wide range of malicious files and URLs
- Filters inappropriate content and sensitive data
- Takes half the time to manage
- Scales to any deployment size

## SHAREPOINT PROTECTION

### Trend Micro™ Enterprise Security for Communication and Collaboration

PortalProtect is a key component of Enterprise Security for Communication and Collaboration—a 4-in-1 solution that protects all of your Microsoft email, IM, and collaboration systems. With centralized management, optimized performance, and tight platform integration, this single solution further reduces administration.

**Enterprise Security for Communication & Collaboration** delivers an airtight defense against the wide range of threats at multiple points and attack vectors.

Enterprise Security for Communication & Collaboration	IM Security	ScanMail Suite	PortalProtect
Protection Point	IM Servers	Mail Servers	Collaboration Servers
Web Reputation	✓	✓	✓
Email Reputation		✓	
Antivirus	✓	✓	✓
Antispyware	✓	✓	✓
Antispam		✓	
Antiphishing	✓	✓	✓
Content Filtering & Data Leak Prevention	✓	✓	✓

• **Trend Micro Enterprise Security** is powered by the Trend Micro™ Smart Protection Network™, our unique in-the-cloud technology that correlates threat data in real time for immediate protection. **Trend Micro Enterprise Security for Communication and Collaboration** leverages the Smart Protection Network for fast, intelligent threat response.

#### PROVEN PROTECTION LOW ADMINISTRATION

PortalProtect is built on the same technologies that make **Trend Micro™ ScanMail™** an industry leader. Both products deliver powerful protection, optimized performance, and minimal administration.

#### EXPAND YOUR PROTECTION

##### Messaging Security

- **Enterprise Security for Communication and Collaboration**
- **IM Security for Microsoft Office Communications Server (OCS)**
- **ScanMail Suite**

##### Endpoint Security

- **Trend Micro™ OfficeScan™**
- **Trend Micro™ ServerProtect™**

##### Centralized Management

- **Trend Micro™ Control Manager™**
