

Trend Micro™

# ScanMail™ Suite for Microsoft® Exchange

High security. Low administration. All in real time.

Enterprises need powerful, multi-layered messaging security to protect business-critical email environments from viruses, spyware, spam, phishing, and other email-borne web threats, as well as data loss. Gateway security may stop the majority of incoming threats at the perimeter, but the mail server is a crucial point for securing both inbound and outbound communications.

**Trend Micro ScanMail for Microsoft Exchange** continues to deliver industry-leading scan engines to help stop the widest possible range of threats while innovative Web Reputation and Email Reputation technologies—powered by the Trend Micro™ Smart Protection Network™—use a unique cloud-client architecture to thwart the latest attacks. Plus regional content filters protect data privacy.

ScanMail is optimized for the most recent Microsoft Exchange platforms to streamline administration and minimize server impact, beating the total cost of competitive solutions by up to 50 percent. The bottom line: ScanMail delivers the latest protections from data theft and loss with the lowest total cost of ownership.

## KEY FEATURES

### Leading Antivirus, Antispyware, Antispam, and Antiphishing Security

- Detects and removes viruses, spyware, Trojans, and worms
- Stops zero-day threats with signature-independent technology
- Employs pattern matching, heuristics, and cloud queries to stop unwanted and fraudulent messages

### New! Email Reputation Technology (optional for Exchange Edge role)

- Bars messages from known bad senders—without relying on content inspection
- Provides immediate protection and keeps network connections free using up-to-the-minute threat intelligence

### Advanced Content Filtering

- Protects sensitive information using keywords, regular expressions, and new regional identifiers
- Enables granular Active Directory-based policy enforcement
- Prevents data loss and compliance violations with over 40 new regional pre-canned policies

### New! Web Reputation Technology

- Blocks messages with malicious web links—before they reach users
- Provides immediate protection using up-to-the-minute threat intelligence

### Half the Administration of Competitive Products

- Strong group configuration and management with centralized logging and reporting
- **New!** Role-based access control with single sign-on
- **New!** Audit logging to track changes to configuration settings
- Integration with Microsoft System Center Operations Manager and Microsoft Outlook® Junk E-mail Filter
- Full Microsoft cluster support, certified for Veritas™

### Optimized for Exchange

- Native 64-bit support for Exchange 2010 and 2007; 32-bit support for Exchange 2003/2000
- Configurable, multi-threaded scanning and CPU throttling, with use of AV Stamp to avoid duplicative inspection

## SOFTWARE

### Protection Points

- Mail Server

### Threat Protection

- Antivirus
- Antispyware
- Antispam
- Antiphishing
- Content Filtering
- Web Threat Protection

## KEY BENEFITS

### Comprehensive Security

Blocks the wide range of spam, malware, and blended threats

### Immediate Protection

Protects against fast-moving, constantly evolving attacks

### Lower IT Costs

Minimizes administrative headaches with strong central management

### Higher Performance

Scans efficiently with negligible impact on server performance

### Reduced Business Risks

Prevents network invasion, system infection, identity theft, data loss, and compliance violations

“Trend Micro ScanMail Suite for Microsoft Exchange is extremely important in our environment. We get hundreds of thousands of email messages daily, and a large percentage of those messages are spam. ScanMail detects the wide range of malware that can come in over email, and also solves the spam problem.”

### Kevin Cavanagh

Data Security Analyst

**ScanMail Suite for Microsoft Exchange** is part of Trend Micro Communication & Collaboration Security, a four-in-one solution to protect your Microsoft email, IM, and collaboration environments. The unique cloud-client security model and correlated threat intelligence of the Smart Protection Network stop threats across all environments so that you can maximize productivity and minimize the risk. And with centralized management, optimized performance, and tight platform integration, it further reduces administration.

**Trend Micro Communication & Collaboration Security** delivers an airtight defense against the wide range of threats at multiple points and attack vectors.

Communication & Collaboration Security	IM Security	ScanMail Suite	PortalProtect
Protection Point	IM Servers	Mail Servers	Collaboration Servers
Web Reputation	✓	✓	
Email Reputation		✓	
Antivirus	✓	✓	✓
Antispyware	✓	✓	✓
Antispam		✓	
Antiphishing	✓	✓	
Content Filtering & Data Leak Prevention	✓	✓	✓

**TREND MICRO™ ENTERPRISE SECURITY**

Trend Micro™ Enterprise Security is powered by our Trend Micro™ Smart Protection Network, unique in-the-cloud technology that correlates threat data in real time—so you get immediate protection with less complexity. Trend Micro Communication & Collaboration Security leverages the Smart Protection Network to stop threats faster and minimize administration.
